Macro Focus Mount

The Macro Focus Mount is a special camera mount with a 2 mm tube extension. The C-Mount flange focal distance will then be extended by 2 mm to 19.526 mm which will in turn reduce the lenses minimum object

distance (M.O.D.).

In order to use our Macro Focus Mount, remove the standard C-mount on the lens and replace them with the appropriate mount above.

Please ensure you use the correct mount to lens as per the above chart. The FP-MU2M is designed for all the machine vision lenses except the FL-HC0614-2M and FL-CC7528-2M. In order to achieve even higher magnifications you can also use the close up adaptors and extension tubes.
